U.S. Patent and Trademark Office PTO-326 (Rev. 04-01)

Art Unit: 2852

1. Newly submitted claims 18-57,62-66 directed to an invention that is independent or distinct from the invention originally claimed for the following reasons:

Claims 18-34,62-63 are directed to an image forming apparatus having a trial copy mode with controller for prohibiting/allowing the execution of the trial copy mode.

Claims 35-51,64-65 are directed to an image forming apparatus having a trial copy mode having first and second displays for inputting data or notifying the operator.

Claims 52-57,66 are directed to an image forming apparatus having a trial copy mode and which reads image data stored in a memory using a box function.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, claims 18-57,62-66 are withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

Art Unit: 2852

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. Claims 1-17,58-61are rejected under 35 U.S.C. 102(a) as being anticipated by Endo et al.

Endo et al. teach an image forming apparatus comprising an image input means 106 for scanning an original document to produce digital image data, a storage means 501,/510/for storing the digitized image data and image forming means 118 for reading the image data and forming an image onto a paper sheet. Various settings can be activated for producing a desired output such as density, duplex mode, magnification, number of sets to be produced, etc. A sample set of sheets can be formed by activating a sample set command key 209. When the sample set key is activated the image forming apparatus switches to a mode wherein a set of copies are made and output to a sorter. Thereafter the image forming apparatus will enter a waiting mode which waits for an operator to either (col.12)line(66 - col.13)line32) accept the output copies or change one of the settings (see col.13, lines 1-20). A copy set numeral can be changed according to whether the sample copy set is accepted or not. If it is accepted, then the remaining desired sets will be the one minus the originally input desired sets. If it is not accepted, then the remaining sets will be the original input desired sets. See col.25, lines 45-63.

3. Applicant's arguments with respect to claim 1-66 have been considered but are most in view of the new ground(s) of rejection.

Art Unit: 2852

Applicant argues that Endo et al. does not teach setting the numeric data information (number of copies to be printed) in accordance with a state of reset of the image forming mode. However, Endo et al. is believed to teach (see Fig.21, and col.25, line.45 – col.26, line 61) that if a setting condition key is changed (S906, S914), the image forming mode will be set to another set of conditions (S915, S905) which will be detected (S908) and the number of copies to be output will be changed accordingly (S909,S910). Thus, the examiner believes that the changing of a setting condition in the image forming apparatus would correspond to applicant's "reset of the image forming mode".

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will

Art Unit: 2852

Page 5

the statutory period for reply expire later than SIX MONTHS from the date of this

final action.

5. Any inquiry concerning this communication or earlier communications from

the examiner should be directed to Robert Beatty whose telephone number is 703-

308-1372. The examiner can normally be reached on M-F from 9 to 6.

If attempts to reach the examiner by telephone are unsuccessful, the

examiner's supervisor, Arthur Grimley, can be reached on (703) 308-1373. The fax

phone number for the organization where this application or proceeding is assigned

is 703-308-3431.

Any inquiry of a general nature or relating to the status of this application or

proceeding should be directed to the receptionist whose telephone number is 703-

308-1782.
